Difficult to apply gel evenly. When the thin part dries, it's hard to peel off. If you use a spatula, you can do it well.

Wore it as a night mask and my face felt very hydrated in the morning. I tried using it as a "pimple patch" though and it peeled off very quickly if not covering a large area

Great product I'm on my second one now. Not sure if the collagen does much but I love how it act as a barrier so my skin care doesn't rub off and my face isn't touching my pillow
